D. ~~FOURTH~~ ~~UNEXPECTED~~ ~~IMPACT~~

none

E. IMPACTS ON PROGRAMS/DEPTS:

What programs/departments will be affected by this proposed action? Include information on the Programs/Departments contacted (e.g., email, memo)

May have an occasional student repeating a course.

F. IF MAJOR CHANGE REASSESSMENT OF THE PROGRAM:

Description of the student learning outcomes assessment process:

JUSTIFICATION FOR ACTION REQUESTED

The purpose of the department and campus-wide curriculum review process is to scrutinize program/degree change applications to make sure that the quality of UAF education is not lowered as a result of the proposed change. Please address this in your response. This section needs to be self-explanatory: If you drop a course, is it because the material is covered elsewhere? Use as much space as needed to fully justify the proposed change and explain what has been done to ensure that the quality of the program is not compromised as a result.

Currently, the BA in Elementary Education requires a grade of C or better in all education and math courses.

However, the current catalog language states that all computer science courses in the program require a grade of C or better. This requirement is being changed to require a grade of C or better in all computer science courses. This change has been approved by the Board of Trustees.

The School of Education would like to clarify or complete a program change so that all courses required for the BA in Elementary Education degree must be completed with a C or better.

In addition, a C or better grade helps insure that students who are potential interns and future teachers show a competency in all content areas.
